

FOURTH QUARTER 2023

Dividend Growth Premium Income Fact Sheet

December 31, 2023

OBJECTIVE

Outperform the S&P 500[®] Index over full market cycles by providing a rising stream of income compared to the S&P 500 Index, resulting in superior risk adjusted total returns. We seek to do so with favorable upside/downside capture results.

INVESTMENT STRATEGY

We believe that companies with an attractive dividend yield, enhanced growth in dividends and consistent earnings results provide capital protection and competitive long-term total return.

We believe that increasingly, investors perceive risk as loss of capital, and high quality, dividend paying companies possess favorable risk characteristics relative to the S&P 500 Index.

Further, we believe that focusing on companies that are growing faster than their peer group versus focusing only on yield or very small increases in the dividend leads to lower volatility and more consistency.

INVESTMENT PROCESS

A fundamental approach that incorporates both a valuation and a relative strength discipline.

We search for companies with a minimum market cap of \$2 billion along with certain dividend momentum attributes including:

- S&P rating typically > B+
- Pays dividend
- Raised dividend three times in last five years
- Dividends and earnings growth > long term S&P 500
- Earning stability

Our investment process is dedicated to seeking companies that possess a combination of three essential criteria: growth of dividends, consistency of earnings and enhanced profitability.

We are looking for companies that display characteristics that reflect strong quality, or are moving quickly higher on the quality scale, and that are likely to improve more than the market expects over our investible time horizon.

INVESTMENT PHILOSOPHY

“We seek companies that possess a combination of three essential criteria: growth of dividends, consistency of earnings and enhanced profitability.”
